

Space Saving Design.

A compact MFP supporting up to legal-size paper, the imageRUNNER 1435iF features a smart, comfortable design that can easily fit on a desktop or in a centralized area with optional paper cassette or cabinet for walk-up convenience.

Efficient Performance.

The imageRUNNER 1435iF employs Canon's imageCHIP Lite platform, providing efficient performance to speed up concurrent print, copy, scan and send jobs. Built-in Ethernet, dual USB 2.0 ports and ample memory enhances the device's productivity.

High Volume Paper Capacities.

Operating at print/copy speeds of 37ppm, the imageRUNNER 1435iF delivers superior quality output. With a print resolution of 600x600 dpi (1200x600 dpi equivalent), users will benefit from faithful reproduction and clarity of their documents. With a standard 600-Sheet paper capacity and a maximum paper capacity of 1,100 sheets, the imageRUNNER 1435iF enables offices to be more productive.

Standard Print Drivers.

Canon's innovative UFR II LT print language is standard on the imageRUNNER 1435iF. UFR II LT is optimized to produce high-speed output by automatically sharing processing tasks between the desktop computer and the device. The imageRUNNER 1435iF also has optional PCL 5e/6 and Adobe PostScript 3, ideal for printing business documents.

Security.

Help secure your office with the standard User Authentication for Send Operations (AuSend). AuSend prompts users for their credentials before accessing the Send screen, and also allows for Send restrictions, such as Email to Self only.

Drive Cost out of Operations.

IT Managers can take control and reduce costs of operations with a variety of tools such as Remote User Interface, imageWARE Enterprise Management Console and plug-ins, and embedded uniFLOW support.
