

ColorWave 3600

Versatile and ideal for multi-user project groups

A highly productive workgroup printer, the ENERGY STAR® qualified ColorWave 3600 features an optional built-in colour scanner and integrated output options. The system is ideal for applications such as CAD, GIS and graphics in the manufacturing, architecture, construction and design industries. It supports in-house or remote workgroups and central print rooms with a requirement for instant dry and water resistant prints on roll-based media

The next generation of CrystalPoint Technology

The next generation of CrystalPoint technology comes with a new media path design in order to support you with higher print quality.

Ideal for multi-user environments

Don't compromise on speed and quality, even at peak hours. The ColorWave 3600 comes with Intel® Core™ i3 processor, dual hard drive and 8GB RAM. With the Adobe® PDF Print Engine 3 (APPE4) you will get accurate previews and fast processing speed with end-to-end PDF workflows.

Reducing the need for servicing

PAINT technology repairs nozzle failures automatically, even on the fly. You will get extended imaging device lifetime and fewer requirements for daily maintenance.

Intuitive touch screen and easy accessibility

Enjoy great usability thanks to an intuitive touch screen with tablet-like gestures. Using the ClearConnect touch screen, you can easily preview, print, retrieve, create sets, zoom-in, zoom-out, select rolls and print profiles, see toner levels and connect to 3rd party software applications.

Secure and connected

Securely print from and scan to your USB, tablet, mobile phone or cloud server by using user authentication features.

Colour scanning

The integrated colour scanner with patented Colour Image Logic® ensures high quality scans regardless of the condition of the original. It automatically optimizes scans by clearing background noise and capturing detail, even from mixed originals that include text, highlighted lines and photos.
