

## ColorWave 3800

---

### All-in-one colour printer for professionals

Designed for wider graphic arts applications, the ColorWave 3700 puts innovation at the heart of your business. It caters for a wide variety of businesses including reprographics, sign and display print providers, and in-house printing applications in industries such as retail, hospitality, POS, education and government. The ENERGY STAR® qualified printer supports custom roll-based media up to 0.8 mm thick by using MediaSense technology. The print capabilities include, but are not limited to a CAD drawing on 80gsm plain paper, a Tyvek banner, a poster on 200gsm matte paper, a self-adhesive film for decorative uses, a canvas media and a blue-back. Up to six different rolls of media can be loaded at one time, making the printer capable of handling many different jobs without having to change rolls in-between. This versatility and high capacity allows businesses to be creative and expand to new profitable areas.

### The next generation of CrystalPoint Technology

The next generation of CrystalPoint technology comes with a new media path design in order to support you with higher print quality.

### Ideal for multi-user environments

Don't compromise on speed and quality, even at peak hours. The ColorWave 3800 comes with Intel® Core™ i5 processor, dual hard drive and 8GB RAM. With the Adobe® PDF Print Engine 3 (APPE4) you will get accurate previews and fast processing speed with end-to-end PDF workflows.

### Reducing the need for servicing

PAINT technology repairs nozzle failures automatically, even on the fly. You will get extended imaging device lifetime and fewer requirements for daily maintenance.

## **Intuitive touch screen and easy accessibility**

Enjoy great usability thanks to an intuitive touch screen with tablet-like gestures. Using the ClearConnect touch screen, you can easily preview, print, retrieve, create sets, zoom-in, zoom-out, select rolls and print profiles, see toner levels and connect to 3rd party software applications.

## **Secure and connected**

Securely print from and scan to your USB, tablet, mobile phone or cloud server by using user authentication features.

## **Colour scanning**

The integrated colour scanner with patented Colour Image Logic® ensures high quality scans regardless of the condition of the original. It automatically optimizes scans by clearing background noise and capturing detail, even from mixed originals that include text, highlighted lines and photos.
